

Tagline Tool

Application:

The Tagline is a tool to which a load-guiding lanyard is attached to assist in controlling the swing of a load during transport and to aid in aligning the load before it is brought to rest.

Operation:

The tool is mounted on a sheet of steel or structural member. The tool is fastened by tightening the screw adjustment. A lanyard is used to guide and control a sheet of steel or structural member.

Inspection:

Pre-Use Inspection

1. Inspect gripping surfaces for wear and defects.
2. Screw should turn freely. Inspect for wear and damage.
3. Inspect body for wear and damage.

Always use genuine Renfro replacement parts.
